

Job Description

Sensory Technical Officer 12 month fixed term contract-28526

Description

- Use your expertise in sensory and food science in this interesting 12 month fixed term contract role
- Showcase your highly influential communication skills with a broad range of stakeholders
- Work for Fonterra at their world class Research and Development Centre in Palmerston North

This is a fantastic opportunity to aid the concept and development of innovation pipelines, business support and capability enablement in the sensory field at Fonterra's world leading Research and Development Centre in Palmerston North.

In this 12 month secondment opportunity you can utilise your previous experience in the dairy or food sensory fields, setting up and delivering technical support based on research requirements to provide results and feedback to the business.

Your previous knowledge of research and sensory panel leadership will enable you to influence direction, providing technical expertise and a solutions focussed ethos as you resolve issues and provide training to facilitate problem solving at a base level.

If you're looking for the next step in your sensory career where you can progress under the guidance of around 100 PhD qualified scientists, technologists and engineers, many of whom are the world's leading experts in dairy science, then this is an opportunity not to be missed

Qualifications

Skills and experience

In order to hit the ground running in this busy role, you will have the following:

- Previous experience in the sensory field preferably from a dairy or food environment
- Knowledge of the design and delivery of quality sensory technical support.
- Experience in training or co-coordinating teams
- Proven influencing skills, with the ability to motivate large groups
- The ability to be an enthusiastic, adaptable and a strong communicator in order to deliver project outcomes

A degree qualification in sensory, dairy or food science is highly regarded for this role.
