

Principal Scientist, Consumer Science-Oral and Wound Care

Job Description

Requisition ID: 1600135210W

PRINCIPAL SCIENTIST CONSUMER SCIENCE – Oral and Wound Care

Johnson & Johnson is the world's most comprehensive and broadly based healthcare Company, touching the lives of nearly a billion people every day. Our Family of Companies throughout the world compete in consumer, pharmaceutical and medical devices & diagnostics markets and have the skills and resources to tackle the world's most pressing health issues.

Job description

The Principal Scientist Consumer Science (CS) will be a CS leader with responsibility for Oral and Wound Care in Asia Pacific (AP) within the Global Consumer RD&E.

The J&J Oral and Wound Care portfolio includes products offered under the Listerine and Band Aid brands. This role is based in Singapore at J&J Family of Consumer Companies' Singapore campus. He or She will bring an understanding of the consumer to the AP cross-functional team charged with driving innovation to deliver experiences and solutions that meet consumers needs and desires.

This person will be an advocate for consumer centric thinking throughout the development process. He or She will partner with the team to translate technology and science into solutions that are impactful for the consumer.

This individual will be responsible for leading the design and execution of research and will ensure that high quality research is conducted according to standardized practices - meeting quality, medical, and regulatory requirements - in collaboration with other responsible functions.

He or She will be responsible for interpretation and reporting of research results, and making recommendations to the team. He or She will introduce new methodologies to the team, partner cross functionally with AP Global Strategic Insights (GSI), AP Marketing and other R&D functions to establish integrated learning plans. He or she will champion a holistic approach to research and challenge the team to deliver better solutions. He or She will collaborate with global CS colleagues on global projects. He may assume responsibility for Consumer Science assignments in other categories based on workload.

Qualifications

Profile and skills:

- Strong communication and leadership skills
- Experience in partnering with and influencing global/multicultural cross-functional teams in a collaborative manner
- Business acumen, strong knowledge of statistical analysis methods for sensory/consumer research are required.
- Ability to function independently and problem solve issues.
- Experience with variety of consumer research methods is required along with good knowledge of appropriate application of descriptive analysis and difference/discrimination methods.
- Fluent in English.

Educational requirements :

Minimum of 4+ years' of industry experience with MS or equivalent or PhD or 6+ years of industry experience with BS or equivalent in Psychology, Statistics, Food Science, Market Research, Biology, Chemistry, or related field.
