

**big enough
to invest in
great ideas.**

**small enough to
still have them.**

At Mondelēz International, we work hard, every day, to delight you with the quality brands you've grown up with. We devote ourselves to creating scrumptious snacks that will give you delicious moments - whether enjoying appetizing, crunchy biscuits with your family or taking a moment to indulge in a sweet, creamy chocolate treat and a chat with friends or simply chewing a refreshing piece of gum. And we're hungry to find new ways of making life even easier and tastier for you and more joyful for us all. So we focus relentlessly on improving our products, our workplace, our alliances, our communities and our world.

In Research, Development, Quality & Innovations (RDQ&I), your skills can be the special ingredient that brings our brands to life. As part of a fantastic team of scientists, engineers and nutritionists, you'll work tirelessly on product design or development, process development, quality, nutrition, sensory and food safety aspects to ensure we deliver a consistent, delightful consumer experience. RDQ&I is where you'll turn great ideas into brilliant brands.

Senior Scientist Consumer Science

Location: Wrocław, Poland

Key responsibilities:

- Lead and conduct single or multi stage medium sized projects, delivering to the required standards and agreed timescales, including designing research to meet objectives, to produce good quality, actionable data, interpreting results, reporting/presenting findings, making recommendations and contributing to decision making.
- Lead category appraisal and DOE studies including the statistical principles applied as part of the overall research plan.
- Lead all aspects of consumer research both qualitative and quantitative including the integration/linking of descriptive and consumer data into a cohesive story.
- May support the execution of CAD (Consumer Aided Design) work by assisting in completing the research including assisting or leading portions of the executional elements including Knowledge Mapping, Value Diagramming, Product Labs and subsequent analysis and reporting of results.
- Effectively partner with stakeholders (R&D and Commercial / Insights) ensuring that the work is in line with the strategic priorities of the business.
- Gather relevant information from different sources to enrich understanding of the context of each project.

the power of big. and small.

- Work with the Consumer Science management team to prioritize workload.
- Look for opportunities to provide informal coaching and to share experience with more junior colleagues.
- Proactively seeking ways to improve all aspects of the department, including functional methodologies, practical solutions and facilities and presenting these ideas in an appropriate way to the Consumer Science management team.
- Contribute to CS Team goals by participating on teams where new methodologies and capability are evaluated, proposed and implemented.
- Contribute to efficient and safe running of the sensory laboratory, including maintenance of the quality system, ensuring that procedures are followed properly and highest standards of work and environment, health and safety are maintained.
- Ensure two-way communication between yourself and other team members.
- Develop knowledge and expertise in relevant category areas.

Requirements:

- University degree in a scientific subject and/or appropriate post graduate qualifications
- At least few years of relevant training / work experience
- Strong knowledge of statistical theory and its application to sensory/consumer research
- Mastery in Discrimination & Descriptive Analysis tools and techniques
- Experience with consumer testing procedures including qualitative and quantitative methods
- Practical experience of application of statistical analysis
- Linking consumer and sensory data into a cohesive story
- Proven track record in effective partnering with clients and/or stakeholders
- Demonstrable competence in primary software applications (Word Processing, Spreadsheets, Presentations etc.) and in use of internet
- Interest in food
- Very well developed communication and organizational skills, problem solving and proactive attitude
- Ability work independently and in a team
- Learning on the fly
- Fluent English, fluent Polish is desirable

So if you're ready to take this fascinating journey, your ideal career is just one small click away.

Please note that application documents in English are required (make sure English version of your CV is uploaded in the application form) and full recruitment process is conducted in English. We will contact only selected candidates
