This role offers an exciting opportunity for a food researcher to work in the area of sugar reduction in chocolate and cookies, in a 12 month project that is sponsored by EIT Food in collaboration with food industry partners in Israel (Strauss and DouxMatok) and Switzerland (Givaudan).

This role offers an exciting opportunity for a food researcher to work in the area of sugar reduction in chocolate and cookies, in a 12 month project that is sponsored by EIT Food in collaboration with food industry partners in Israel (Strauss and DouxMatok) and Switzerland (Givaudan). We are seeking someone with knowledge and experience in the analysis of food physical properties, such as rheology and microscopy and, ideally, experience in sensory science. You will be working within the University of Reading but in close collaboration with all partners.

You will have:

- A PhD (or nearing completion) in an appropriate specialist area related to food science
- Skills in Physical Properties of Foods; ideally Rheology and Microscopy
- Sufficient experience in food analysis to work in laboratory independently

Closing date: 23/11/2018

Interview date: 3/12/18

The University is committed to having a diverse and inclusive workforce, is a Stonewall Diversity and Global Diversity Champion, and supports the principles of the Race Equality Charter and Athena SWAN. Applications for job-share, part-time and flexible working arrangements are welcomed and will be considered in line with business needs.
