

Job Title: Junior Sensory Specialist
1 year contract

Job description

We are searching for a dynamic and independent junior sensory specialist to support our product development and innovation projects for Europe, Middle East and Africa. The individual will be responsible to set up and run internal and external sensory test, and to assist in the execution of consumer research program under the supervision of his/her manager.

Key responsibilities

- Work under the supervision of his/her manager
- Manage internal sensory tests: Schedule, set up and conduct internal sensory test, such as triangle tests and sensory mappings, using Compusense. Perform the appropriate statistical analysis, write reports and provide recommendations.
- Coordinate sensory and consumer tests with external suppliers.
- Participate to the different activities of the sensory lab
- Act as a stability panel member

Qualifications and Functional Capabilities Required

- BS or MS food or sensory science or related fields
- 1-3+ years of relevant experience in sensory or consumer research
- Good communication skills
- Good knowledge of sensory methodologies including descriptive, discriminative
- Good understanding of the statistics related to sensory and consumer research
- Solid skills in executing sensory testing protocol
- Strong organisational and time management Skill
- Ability to function independently as well as work within a team, demonstrating flexibility and ability to coordinate small projects
- Use of computer software such as Excel, Word, Compusense and statistical package
- Proactive team player, enthusiastic, curious and independent
- Fluent in English. An additional language is a plus
- This position is based in Brussels. This will be a 1 year contract.
